Vít Vilímek, Charles University, Czech Republic
Fawu Wang, Tongji University, China
Wei Shan, Northeast Forestry University, China

KLC2020 Managing Committee

Kyoji Sassa (Chairman), Secretary General, Secretariat of the Kyoto Landslide Commitment 2020
Kaoru Takara, Managing Director, Secretariat of the Kyoto Landslide Commitment 2020
Matjaž Mikoš, Co-Chair of the Global Promotion Committee of the International Programme on Landslides
Qunli Han, Co-Chair of the Global Promotion Committee of the International Programme on Landslides
Nicola Casagli, President of the International Consortium on Landslides
Peter Bobrowsky, Immediate Past-president of the International Consortium on Landslides

Advisory members for KLC2020

Abou Amani, Director, Division of Water Sciences, Secretary, Intergovernmental Hydrological

Programme (IHP), UNESCO

Soichiro Yasukawa, Programme specialist, Coordinator for Disaster Risk Reduction and Resilience, UNESCO

Daniel Lebel, Director General, Geological Survey of Canada, Natural Resources Canada, Canada

John Ludden, President of the International Union of Geological Sciences (IUGS)

John LaBrecque, Chair of IUGG GeoRisk Commission, Center for Space Research, U.Texas Austin, USA.

President of the International Union of Geodesy and Geophysics (IUGG)

Rafiq Azzam, President of the International Association for the Engineering Geology and the Environment (IAEG)

Paolo Canuti, Past president of the International Consortium on Landslides (ICL), Italy.

Sálvano Briceño, First chair of the Global Promotion Committee of the International Programme on Landslides

Badaoui Rouhban, Chair of the KLC2020 Launching Session and Moderator of ISDR-ICL Sendai Landslide Partnerships 2015-2025 Session of 3rd WCDRR in 2015

KLC2020 Official Promoters

Host organization

International Consortium on Landslides (ICL) / Nicola Casagli

Public sectors: KLC2020 Official Promoters-public

International Unions/Associations, Governmental organizations, Universities and Research institutes

- The International Union of Geological Sciences (IUGS) / John Ludden
- The International Union of Geodesy and Geophysics (IUGG) / Kathy Whaler
- The International Association for the Engineering Geology and the Environment /Rafiq Azzam
- International Geosynthetics Society (IGS) / John Kraus
- Geological Survey of Canada, Natural Resources Canada, Canada / Daniel Lebel
- Faculty of Civil and Geodetic Engineering, University of Ljubljana, Slovenia / Matjaž Mikoš

Progress in Landslide Research and Technology

-Book Series of the International Consortium on Landslides-

Progress in Landslide Research and Technology is the Open Access book series of the International Consortium on Landslides (ICL). The series provides a common platform for the publication of recent progress in landslide research and technology for practical applications and the benefit for the society contributing to the Kyoto Landslide Commitment 2020, which is expected to continue up to 2030 and even beyond to globally promote the understanding and reduction of landslide disaster risk, as well as to address the 2030 Agenda Sustainable Development Goals. The contributions include the following seven categories:

1. Original articles (minimum 8 pages): Original articles reporting progress of landslide research and technology.
2. Review articles (minimum 8 pages): Review of landslide research and technology in a thematic area of landslides. A review article integrating a series of research and technology of the author or its group.
3. IPL/WCoE/Kyoto Commitment activities (minimum 8 pages): Progress or achievements of the projects of the International Programme on Landslides (IPL) and the World Centres of Excellence on Landslide Risk Reduction (WCoEs), and Kyoto Landslide Commitment.
4. Teaching tools with online extras (minimum 8 pages): User-friendly teaching tools with extras (i.e., photos, illustration, videos, guidelines & manuals) online to fill the gap between the available level of science and technologies and the practical use in the society.
5. Technical note & Case studies (minimum 4 pages): Technical note and case studies on landslides and landslide disaster risk reduction practice.
6. World Landslide Reports (2-4 pages): Landslide reports from landslide-prone developing countries and urbanizing areas of the developed countries from around the world. No processing charge, but limited to approximately 10 reports per issue.
7. Introduction of KLC2020 Official Promoters (1-3 pages): KLC2020 Official Promoters are eligible for this category. The introduction of the official promoters is published throughout the year.

Call for Contribution

Progress in Landslide Research and Technology (Progress-LRT)

Book Series of the International Consortium on Landslides

Progress-LRT was founded by the Launching Declaration of the ICL Open Access Book Series “Progress in Landslide Research and Technology” for the Kyoto Landslide Commitment 2020 at the end of High-level panel discussion “Review of KLC2020 and the way forward” during the Fifth World Landslide Forum held at the National Kyoto Conference Center, Kyoto, Japan on 3 November 2021.

The series provides a common platform for the publication of recent progress in landslide research and technology for practical applications and the benefit for the society contributing to the Kyoto Landslide Commitment 2020, which is expected to continue up to 2030 and even beyond to globally promote the understanding and reduction of landslide disaster risk, as well as to address the 2030 Agenda Sustainable Development Goals.

Aim and scope	Original articles for practice and society
Online access and Print version	Open access for digital version. Print version is purchased from Springer Nature.
Publication fee For the funding issue	Book processing charge is 50 USD/page for regular 0 USD for each ICL full member and each KLC2020 official promoter (until 10 pages), 25 USD for each ICL associate and each supporter (until 10 pages)
Page number for each category	<ul style="list-style-type: none"> ● Original articles (minimum 8 pages) ● Review articles (minimum 8 pages) ● IPL/WCoE/Kyoto Commitment activities (minimum 8 pages), ● Teaching tools with online extras (minimum 8 pages) ● Technical note & Case studies (minimum 4 pages) ● World Landslide Reports (2-4 pages) : No processing charge, but limited to approximately 10 reports per issue. ● Introduction of KLC2020 Official Promoters (1-3 pages)
Process from contribution to publication and the necessary standard weeks	<ol style="list-style-type: none"> 1. Contribution 2. Decision of in-depth review or rejection (one week) 3. Payment of book processing charge by credit card 4. In-depth review (2 weeks) 5. Revision by the authors when needed (2 weeks) 6. Decision of acceptance or rejected (1 weeks). In the case of rejection, the book publication fee is refunded. 7. Online publication (around 4 weeks in Springer Nature) 8. Book publication (Spring issue or Autumn issue in the regular case)
Editorial Manater prepared by Springer Nature	Online Conference Service
Planned founding issues	July and November in 2022

Title of Contribution for Progress in Landslide Research and Technology Book Series (do not exceed 100 characters including spaces)

Firstname Firstsurname, Secondname Secondsurname

Abstract

This is an example text template for the full paper submission to the Progress in Landslide Research and Technology book series. The book series publishes original articles for practice. Contributed articles align with one of five categories: Original articles, Review articles, Case studies, IPL/WCoE/Network activities and Teaching tools with extras online (PPT, Video). The Abstract should be concise and self-contained, clearly stating main conclusions of the paper. The length should be of minimum 150 words, and within 300 words. The style to be used, according to the Template Style List, is the Normal Style with justification. At the end of the abstract text a list of keywords (minimum: 3 maximum: 7) should be added as shown in this template.

Firstname Firstsurname (✉)

University of the Moon, Centre for Disaster Studies,
Address, City Name and Zip Code, Country

e-mail: first@moon.plt

Secondname Secondsurname

Peking University, Department of Sciences, Beijing 100082,
China

e-mail: second@pku.ac.cn

The paper size should be set to A4 size (210 mm × 297 mm). The minimum paper length is 10 pages. Please submit both MS-Word and pdf files.

Keywords

keyword1, keyword2, keyword3...

General body of the manuscript

The main text of the paper should be formatted using Normal Style according to the Template Style List. The first paragraph of each Section should not have right indentation whilst following paragraphs should, as in the following.

Left indentation is of 5 mm (as per Template Style Normal). The Normal style of text is based on the Constantia font, available within Microsoft Word software in all recent releases, size 9. Line spacing is single. The page format must be strictly respected as per Template Page Format. In particular, two columns formatting with column width of 77 mm and column spacing of 6 mm should be used. Page margins are: Top 40 mm; bottom 40 mm; Internal side 25 mm; External side 25 mm.

Sections of the manuscript

How to start?

Copy the template file, Templatebook-Fullpaper.docx, to the template directory. This directory can be found by selecting the Tools menu, Options and then the File Locations. When the Word program is started, open the File menu and choose New. Select Templates, On my computer, and then the template, Templatebook-Fullpaper.docx.

Please rename the document before you start writing your paper.

Section and sub-sections

Each manuscript section should be entitled according to the Template Style List using up to 3 levels of indentation: style Heading 1 for the main title of the section, style Heading 2 for a possible sub-section and, if needed, style Heading 3 for a further sub-level. We recommend not use more than 3 levels on titles and sub-sections. The example up here shows the use of two levels of titles for section and sub-section heading.

The font to be used for all Headings is Calibri. Heading 1 has font size 11, typeface bold and colour blue with RGB=(0,102,153). Heading 2 has font size 10, typeface bold, black colour. Finally, Heading 3 has font size 10, typeface bold + italic, black colour. However, please choose the correct style in the Style List of the Template file so that formatting is automatically applied to avoid mistakes.

Figures and figure captions

Figures are allowed either in greyscale or in colour. It is possible to insert column-wide figures (half-page width) with maximum width of 77 mm and double-column-wide figures as well with a max allowed dimension of 160 mm. In any case, the max height is 230 mm. Figure

should be directly attached within the document at the right place using preferentially the “insert -> image -> from file” option of Microsoft Word using a recommended resolution of 400 dpi for greyscale images and of 300 dpi for colour images. TIFF format is recommended.

The following is an example of column-wide figure. The figure line (the line of text in which the figure has to be placed) should be formatted choosing the appropriate Style “Figure” from the Template Style List. This will ensure proper distancing between figure and surrounding text. However, authors are free to add one or two empty rows of normal text to adjust formatting and visual appearance.

Fig. 1 Example of half page figure. Captions which are 2 or more rows long must be justified. Shorter caption must be column-centred. Please ensure to select the style “Figure Caption” and to place caption below figure. Figures should be cited in text using the short: “Fig.”.

Title, authors, affiliations and other issues

Title and authors

The paper should start with the title section which has a

Short Running Title of Contribution

special single-column formatting (see top of first page). Please make sure to maintain section separation to ensure proper column formatting of the document. In case you inadvertently delete the section break, insert a new one on top of the beginning of manuscript main body using Microsoft Word option “insert -> break -> section break -> continuous”.

Author’s names should precede paper title as in the example above. Please use style “Authors” for this part of paper, which uses the following formatting: font Calibri, font size 12, typeface bold, colour black, left indent 5 cm, vertical spacing after 3 pts. Each author has to be followed by a superscript number in parentheses corresponding to the author’s affiliation (see also below). The title has to be formatted using the style “Title” reflecting the following format: font Calibri, font size 16, typeface bold, left indent 5 cm, justified, vertical spacing before 6 pts, after 12 pts, colour blue RGB=(0, 102, 153).

The title should follow, according to the ICL journal “Landslides” style, the author’s names.

Finally, Affiliations conclude the first section of the paper, according to the style “Affiliation” in the Style List of paper Template. Each affiliation must be preceded by the relevant number between parentheses as in the example at the top of this file. Affiliation formatting is: font Calibri, font size 9, typeface bold, colour black, left indent 5 cm, vertical spacing after 3 pts. Each affiliation must be placed on a separate line, using the following order:

Department/Branch/Office, Institution/University, Address, Country. For the affiliation of the corresponding author also the following information must be included: email and/or telephone number.

Each author should also define a short “running” author names and title to be used in the right of the even pages and in the left of the odd page headings, respectively (see example above in the page heading where the Template has the sentences “F. Author, S. Author, T. Author” and “Short Running Title of Contribution”). The running title should be limited to a maximum of 20 characters, blank spaces included. The page headings have a specific style “Page heading” to be used.

Maths and formulas

All mathematical notations should be kept outside normal text paragraphs with the exception of single (or very simple combination of) symbols. An example of use of in-text symbols is this: β is defined as the slope angle in degrees. More complex expressions should be placed under the style “Equation” and inserted in the manuscript as equation objects using the proper Microsoft Word commands (such as e.g. “insert -> object-> Mathtype”). Please avoid copy-pasting of equations as images. If equation numbering is necessary, please use a right-sided numbering between squared parentheses as in the following example.

$$G = \left(\frac{e^2}{\sum r_i} \right) \cdot [\cos \alpha \cos \beta]^{-1.3} \quad [1]$$

All the units of measurement used in the paper should be in the SI system and every time a new symbol, group of symbols or specific operator is introduced, it should be explained and described along with its unit of measurement if appropriate.

Tables

In all the manuscript, table have to be formatted according to the following example. It is possible to

insert a single- or a double-column table (if needed) provided that the author insert the proper section breaks to ensure column formatting separation between sections.

Table format has to be copy-pasted from the example below, using font Calibri, font size 9, column heading colour white, text colour black.

Table caption must precede the table, and has to be formatted according to the style "Table caption". Maximum table width is 82 mm for single column tables and 170 mm for page-wide tables.

Table 1 Example of table.

Col Head 1	Col Head 2	Col Head 3	Col Head 4
Text	34.90	17/11/2011	Descr 1
Text	12.98	01/06/1998	Descr 2
Text	3.64	31/02/1900	Descr 3

Colours, formatting and fonts are as per template (Calibri 9 pt). Please ensure left justification for alphanumeric text and right justification for numbers.

Use same number of decimals with floating point numbers. Table should be cited in text using the short: "Tab.".

In particular, Table colour is as follows: heading row and grid: blue RGB=(0,102,153); normal text rows: light cyan RGB=(204,236,255).

It is possible to add page-wide sections (using the appropriate section breaks as explained and as exemplified below, to insert large figures. The maximum allowed width is 170 mm. Also remind that max allowed height for both figures and tables is limited to 230 mm. Please remember that in this case you need to insert two section breaks (continuous): one just before the figure which starts single-column style, and the other one just after the figure caption, which tells the system to stop single column formatting and go back to double-column.

Please position your large figures in the best way, as to avoid large empty spaces on page.

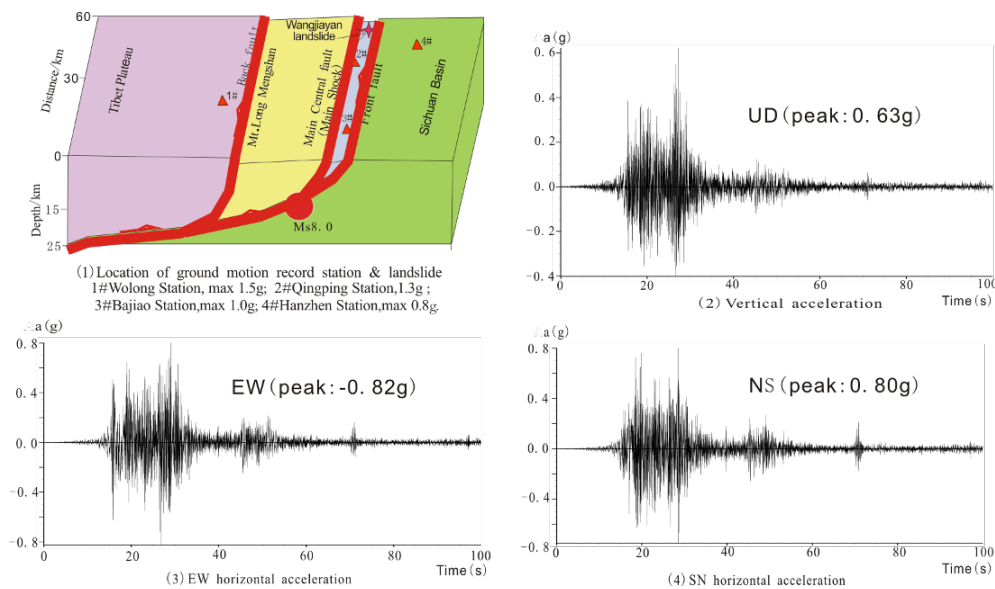

Fig. 2 Example of two-column figure. In case the caption of the figure is only one row, it must be centred

Short Running Title of Contribution

In case this is not possible, add empty rows typing carriage-return characters until the visual appearance of the page is maintained, as in the following example.

The papers contribute to the Progress in Landslide Research and Technology book series should follow the rules depicted in this Template Guideline and, furthermore, have a minimum length of 10 pages.

Acknowledgments

In the Acknowledgments section, appearing just before the References, the authors may credit others for their guidance or help. Also, funding sources may be stated. The Acknowledgments section does have a section heading at level 1, as in this example. Following this section the References section begins for which authors must use the style "Reference" (Font Calibri, font size 9, first row left indented 0.4 cm) and use reference citation rules as per the journal Landslides. Please follow the rules of the same journal also for citations within the text body.

In the following section we present some example of formatting for references related to edited books, conference proceedings, periodic journal papers, scientific reports and web sites. References must be, firstly, in alphabetical order and then in date order, descending.

For any other formatting issue please refer to the editorial guidelines and style used by the ICL journal "Landslides", edited by Springer.
